OPTIONS, New Products
2024 Onwards

ALL DACs (Classic & Platinum Series)

Network Player Option, card only	£1,350
I2S Option, card only	£550
Remote Control for M3*	£550
Headphone Driver Option for M3*	£550

All pricing is intended for new products ordered from the factory at the point of sale. All products are sold with a dedicated remote, except the M3 DAC*. The price for the Headphone Driver is from newly ordered units; see the next page for legacy or upgrade options. From January 2024, all DACs will have a blank Ethernet/I2S slot available for future upgrades (thus not requiring a new rear panel, and pricing above for upgrade will be applied). Please note that only one of these options (Ethernet or I2S) can be installed simultaneously.

UPGRADES, New and Legacy Products Pre-2024

ALL DACs (Classic & Platinum Series)

Network Player Option, with new rear panel**	£2,000
I2S Module Option, with new rear panel**	£1,200
MDx Processor upgrade**	£2,500
LCD Display upgrade***	£1,650
Headphone Driver Option for M3 , requires a new LCD Display and front panel***	£2,200
Remote Control Replacement (All models)	£550

** All pricing is intended for parts only. Some upgrades might require a new-style LCD display and/or an MDx module update. While most upgrades will be processed by ourselves in the UK, some might need a return to the factory to be successfully installed; please enquire with the serial number of the unit in question to process a quote for total costs.

*** A new LCD upgrade requires a new front panel and likely an MDx Processor upgrade. The price for the front panel does not include the MDx module upgrade and is intended for parts only. While most upgrades will be processed by ourselves in the UK, some might need a return to the factory to be successfully installed; please enquire with the serial number of the unit in question to process a quote for total costs.
