Lectures and Presentations

SYMMETRY [Vale] - Once again Mike Valentine of Chasing the Dragon will be presenting 2 lectures, in our room. This year should be very exciting, for recently Chasing the Dragon have recorded a double Direct Cut album called 'Vivaldi in London'. It is the companion to their renowned 'Vivaldi in Venice' which features the finest chamber orchestra in Venice. The same orchestra was brought in early December to Air Studios. Although the new album was directly cut to vinyl, the 8 microphones used were recorded directly to their renovated Studer 1-inch A80 8 Track Recorder. Mike has brought the machine to the show and with the aid of a Neve mixer, will be playing back the original 1-inch master tape and demonstrate how the individual microphones were mixed together to produce the final album. Probably a first at a Hi-Fi show! He will also be playing the direct cut vinyl which should make for a very interesting event!

Times – Visit Vale Suite for details

AUDEN DISTRIBUTION [Syndicate 10] - Why Audiomica cables?

Marcin Knopik from Audiomica gives a brief overview of the brand and technologies along with a comparison demonstration of three levels in the range. Around 30 minutes. Marcin will be on hand for the duration of the show for any questions and individual dems should you want them.

Times – 11:00 – 15:00

CONNECTED – FIDELITY [Syndicate 20] - are demonstrating the benefits of using balanced power through our AC-2K 2Kw unit, as opposed to mains power from the wall. This A/B demonstration will take place regularly throughout the Show.

AIRT AUDIO [Syndicate 9] – will be presenting three stage Lowering the Noise Floor Approach at the show, with on the hour presentations lasting approximately 20 minutes.

In Hockenheim room, the system will feature Hegel, Merason, Eggleston-Works, Audiomica, and MusicWorks. On Digital to analogue duty from an Innuos Statement+ is the supremely musical Merason DAC1mkII. Hegel Viking will be reminding us, if we need it, how good the format is. Hegel P30A is a superb pre-amp, maintaining signal purity to a level not many other pre-amps can match, a formidable partnership with a pair of H30A power-amps. EgglestonWorks Viginti loudspeakers encapsulate the brand ethos in a relatively compact form and certainly deliver the performance to match the amplification. Connecting all these together will be the new reference from Audiomica, Silver Signature, delivering an air and space difficult to find from any other cable brand. In Syndicate 10 we have the two recent Hegel product introductions, H600 powerhouse integrated amplifier partnered with the Viking CD player. Terrific musical performance from these 2 units. Power blocks and cables for both systems will be from MusicWorks, a brand we have used for more than a decade. AcouPlex isolation products, also from MusicWorks will be in use throughout the systems.
